## PX TRANSMATIC VI

### Product Description

PX Transmatic VI is low viscosity premium synthetic automatic transmission fluid that has been specially formulated to meet the latest GM/ Holden transmission requirements. The synthetic fluid based combined with superior additive technology, gives a product that provides exceptional low viscosity with improved low temperature performance, shear and friction stability.

### Applications/ Benefits

PX Transmatic VI is premium automatic transmission fluid suitable for late model and imported vehicles such as those from Holden, Opal and Chevrolet. It can also be used for power steering applications except where specialized fluids are called for.

- Provides improved shift feel, friction durability and oxidative stability
- Excellent low temperature fluidity
- Provides better fuel economy
- Superior anti-wear protection
- Suits most 2006 and later GM manufactured transmissions

### Typical Characteristics

Test Description	Result
Colour	Red
Specific Gravity @ 15 0 C	0.846
Flash Point, Deg. C	198
Pour Point, Deg. C	-45
Kinematics Viscosity @ 40C (cSt)	27.13
Kinematics Viscosity @ 100 0 C (cSt)	5.75
Viscosity Index	158

### Specifications

- DEXRON VI®
- Aisin Warner AW-1
- HONDA DW-1
- GM PN 88863400, 88863401
- NISSAN/INFINITY : MATIC S
